

Download Renal Colic And Urolithiasis Practice Patterns In Canada A Survey Of Canadian Urological Associatio

Herein we describe the practice patterns of members of the Canadian Urological Association (CUA) with respect to nephrolithiasis (intra-renal calculi), proximal ureteric and distal ureteric stones. We collected information on the actual pattern of treatment and urologists' opinion of the ideal treatment to identify discrepancies. Renal colic and urolithiasis practice patterns in Canada: a survey of Canadian Urological Association members CUAJ Volume 5 No 4 Oct 2011. indd 324 9/30/11 3:59 PM Renal colic and urolithiasis practice patterns in Canada: a survey of Canadian Urological Association members Raj Satkunasivam Division of Urology, St. Michael's Hospital, Keenan Research Institute, University of Toronto, Toronto, ON Renal colic and urolithiasis practice patterns in Canada: a survey of Canadian Urological Association members., Renal Colic And Urolithiasis Practice Patterns In Canada A Survey Of Canadian Urological Associatio.
