

Download Understanding And Treating Bipolar Disorders Mental Health Issues

Mental illnesses are disorders of brain function. They have many causes and result from complex interactions between a person's genes and their environment. Many children, and especially adolescents, experience mood swings as a normal part of growing up, but when these feelings persist and interfere with a child's ability to function in daily life, bipolar disorder could be the cause. Mental health clinicians traditionally viewed sleep disorders as a symptom of a psychiatric disorder, but research suggests that in some patients sleep issues...
