

Download Abstraction In Artificial Intelligence And Complex Systems

In computer science, artificial intelligence (AI), sometimes called machine intelligence, is intelligence demonstrated by machines, in contrast to the natural intelligence displayed by humans and other animals. Artificial general intelligence (AGI) is the intelligence of a machine that could successfully perform any intellectual task that a human being can. This Artificial Intelligence course provides training in the skills required for a career in AI. You will master TensorFlow, Machine Learning, and other AI concepts, plus the programming languages needed to design intelligent agents, deep learning algorithms & advanced artificial neural networks. Be at the cutting edge of the computing and technology industries with this BSc (Hons) Computer Science with Artificial Intelligence degree. Find out more., Abstraction In Artificial Intelligence And Complex Systems.
