

# Download Adventures In Polymer Clay

A little over a decade ago, my sister helped me start up my art business “Mystic Reflections.” At the time, I had just a small website and most of my artwork was black-and-white sketches that I sold at craft shows. What is Polymer Clay? Polymer clay is a type of hardenable modeling clay that is versatile and pliable. This medium can be used to create jewelry, sculptures, vessels or anything you can imagine. Make your own jewellery at home easily using metal clay! Metal clay is a wonderful almost magical material. It's made from extremely fine particles of metal, mixed with organic binders and water. Easy, no bake clay recipe that is 100% child-friendly and requires no special ingredients other than your own creativity., Adventures In Polymer Clay.
