Vocal Cord Disorders - an easy to understand guide covering causes, diagnosis, symptoms, treatment and prevention plus additional in depth medical information. What is alkaline water? Alkaline is the opposite of acid. It is sometimes also called "basic." The way we measure acid is by the pH scale, and this scale can be confusing. pH 7 is neutral, that is, it is neither acidic nor alkaline. Gastroesophageal reflux disease occurs when the amount of gastric juice that refluxes into the esophagus exceeds the normal limit, causing symptoms with or without associated esophageal mucosal injury (ie, esophagitis; see the image below). Gastroesophageal reflux disease (GERD) is associated with a set of typical (esophageal) symptoms, including heartburn, regurgitation, and dysphagia. (However, a diagnosis of GERD based on the presence of typical symptoms is correct in only 70% of patients.) In addition to these typical symptoms, Reflux Laryngitis And Related Disorders Third Edition.
