This resource is designed to inform service providers and practitioners about corporal punishment research and legislation. It outlines recent research literature (from 2000 to 2016) and discusses the use and effects of corporal punishment on children. School corporal punishment refers to causing deliberate pain or discomfort in response to undesired behavior by students in schools. It often involves striking the student either across the buttocks or on the hands, with an implement such as a rattan cane, wooden paddle, slipper, leather strap or wooden yardstick. WASHINGTON — Corporal punishment remains a widely used discipline technique in most American families, but it has also been a subject of controversy within the child development and psychological communities.
