

Download Science Firsts From The Creation Of Science To The Science Of Creation

The science of science (SOS) is a rapidly developing field which aims to understand, quantify and predict scientific research and the resulting outcomes. Our new exhibit "Firsts in Flight: A Hidden History," tells visitors about significant contributions made by African Americans -- particularly by African American women -- to our country's history of aviation and space flight. The Genesis creation narrative is the creation myth of both Judaism and Christianity. The narrative is made up of two stories, roughly equivalent to the first two chapters of the Book of Genesis. The history of science can at times read like a list of bearded old men (sorry Darwin), but there have been many incredible and inspiring women who have changed our understanding of the world around us, and we don't need to wait for Ada Lovelace Day to celebrate them., Science Firsts From The Creation Of Science To The Science Of Creation.
