

# Download Valuation Of Regulating Services Of Ecosystems

The Millennium Ecosystem Assessment (MA) report 2005 defines Ecosystem services as benefits people obtain from ecosystems and distinguishes four categories of ecosystem services, where the so-called supporting services are regarded as the basis for the services of the other three categories. To enter widespread use, ecosystem service assessments need to be quantifiable, replicable, credible, flexible, and affordable. With recent growth in the field of ecosystem services, a variety of decision-support tools has emerged to support more systematic ecosystem services assessment. Ecosystems are not static but dynamic and discontinuous systems with interactions and connections evolving both spatially and temporally. They represent ecological processes and the resources they provide can be expressed in terms of goods and services. Measuring what matters in agriculture and food systems: a synthesis. The Economics of Ecosystems and Biodiversity (TEEB) (2018). Measuring what matters in agriculture and food systems: a synthesis of the results and recommendations of TEEB for Agriculture and Food's Scientific and Economic Foundations report., Valuation Of Regulating Services Of Ecosystems.
